THE TARIFF QUESTION.

It is a matter of congratulation that tie declarations of the Chicago convention upon the cuestions that now attract the interest of our people are so clear and emphatic, and it is a durther chase of congratulation in fact, that the convention utterances of the cemocratic party, if in any degree uncertain and contracictory, can now be judged and interpreted by executive acts and mest sages, and by definite propositions in legislation. This is especially rue of what is hopmarly known as the tari? The issue rannot now be obquestion. It is not a contest between schedules, but between while a bart brincio.es. Foreign competitors in our marsets have wit route; instinct seen low one issue of this contest may bring them advantage, and our own because are not so cult to miss or neg ect the grave interests that are involved for them.

#### ASSAULT UPON PROTECTION.

The assault upon our protective system. is open and defiant. Protection is asprinciple, and those who hold and views sincerely cannot stop short an absolute elimination from our The Mila of is only a step, but it is toward an object that the leaders of democratic thought and legislation have clearly in mine. The important mes tion is not so much in the ength of the step as the direction of it. Sucree by the executive message of December last. by the Lins on, by the debate in congress and by the St. Louis platform, the democratic party will, if supported by the country, here the tari." aws upon a pure v revenue pasis. The fact that those who tesch that the import only upon a foreign goods sold in our marret is paid by the consumer and that the price of Comestic competing articles is ennanced to the amount of the imported articles; that million (o) ars collected for customs cuties represents many mi lions more which do not reach the treasury out are paid by our citizens as increased cost of domestic productions resulting from taril aws, may not intend to discredit in the mines of others, our system of levying duties on competing foreign products, but it is clearly a reacy described in their own. We cannot doubt without impurning their integrity that if free to act upon their convictions they would so revise our aws as to ay customs revenue that are country, in tils to place upon the free ist a. peting foreign products. I do not stop to refute the theory as to the effect of our cuties. Those who advance it are ajudents of maxims and not of marke's. They may be safe y allowed to call their project "tarif reform" if the people up cerstand that in the end the argument compels free trace in all competing pro . Tais end may not be reached abruptly, and the approach may be a companied with some expressions ( sympathy for our protected industries and our worsing people; but it will cortainly come if these early steps do not arouse the people to effective resistance.
